ABOUT

I'm a 19 year-old **Full-Stack Developer** with **AI** expertise in building scalable web applications and AI-driven solutions. I am proficient in **modern front-end** and **back-end technologies**, with hands-on experience in **Generative AI, LLMs, LangChain, and Vector Databases**. I am passionate about leveraging technology to **drive innovation, automate processes**, and **enhance user experiences**. Seeking opportunities to contribute my skills while continuously learning.

SKILLS

- Front End: HTML, CSS, Bootstrap, Tailwind CSS, **JavaScript, React.js**, Redux Toolkit, Zustand
- Backend: **Python, Django**
- Dev Ops: **Pythonanywhere**
- Generative AI: **LangChain**, Hugging Face, Vector Databases, **Open AI, Gemini, Llama 2** and other **free LLMs**
- Automation: **N8N, Creating complex AI agent workflows**
- Other: CRM APIs, **Github**, Google APIs, **Google Workspace Apps**, **REST APIs**,

PROFESSIONAL EXPERIENCE

Idea Rise Technologies

→ Software Engineer Intern (*August 2024 - January 2025*)

- Developed **responsive web apps** using **Bootstrap, JavaScript, ReactJs, Python & Django**.
- Worked extensively with **Google APIs, CRM Tools, N8N, Github, REST APIs, Open AI APIs**.
- Engaged in peer reviews, contributing and discussing **debugging, optimization & code quality**.

FIEN Foundation Technologies

→ Web Development Intern (*August 2025 - November 2025*)

- Developed a full-fledged school management system using **Python, Javascript, MySQL**.
- Implemented core academic modules including **calendar, automated timetables, exams**, etc.
- Designed **role-based** dashboards for **admins, teachers and students** with **smooth UX** flow.

PERSONAL PROJECTS

→ Pipedrive Manager ([Go To Pipedrive Manager](#))

- Developed an application allowing users to connect their Pipedrive account via API. Features include creating and managing Deals and Contacts, unique Form and **Webhook URLs** for external interaction and **responsive design**.
- Languages Used: **HTML, Bootstrap, Django**

→ Ledger Pro ([Go To Ledger Pro](#))

- Developed a **SaaS** web app for businesses with a sleek, responsive UI. Users can register their company, add employees, track transactions, and automate stock updates. Features include full CRUD operations, customer management, and downloadable invoices.
- Languages Used: **Django, React.js, Tailwind CSS**

→ Document AI ([Go To Document AI](#))

- Developed an **AI-driven** application that extracts insights from document images and answers any related questions using Gemini AI.
- Languages Used: **Python**

EDUCATION

B.C.A, Mangalayatan University (*2024 - 2027*)

INTERESTS

- Exploring AI advancements, software development trends, and automation technologies
